

REQUEST FOR EXCEPTION TO INFORMATION TECHNOLOGY STANDARDS AND POLICIES

INFORMATION TECHNOLOGY DEPARTMENT
SFN 51687 (7-2004)

Request Number (ITD Use Only)	
Department Name North Dakota Department Of Public Instruction	Department Number 201
Contact Person Doug McCrory	Telephone Number 701-328-2189
Standard/Policy for Which Exception is Requested	
<input checked="" type="checkbox"/> Information Technology Standard	Code Number AS001-03
<input type="checkbox"/> Statutory Policy *	Indicate Requirement for which an Exception is Required
	<input type="checkbox"/> Network Services <input type="checkbox"/> Electronic Mail <input type="checkbox"/> Hosting Services <input type="checkbox"/> Application Server <input type="checkbox"/> File & Print Server Administration <input type="checkbox"/> Data Base Administration
Justification for Request (Statutory Policy Exceptions require a business case - http://www.state.nd.us/ea/standards/doc/exception-bc.rtf) Use a classic ASP program already developed at the federal level to build a DPI data dictionary. There are no COM objects written in VB 6 with this program. DPI would like to use an existing Federal program already developed and freely available. DPI will add ND specific pages to the application. This application displays data standards used nation-wide and it is DPI's goal to implement these standards. The benefit of using this application is to save future maintenance efforts; As changes are made to the data dictionary program at the Federal level those changes can be brought into the DPI dictionary with little effort, limiting the maintenance to ND specific objects.	
Alternative technology or service and its impact Develop a program in .NET and make maintenance changes to the DPI program when the federal program changes yearly. This will be a more expensive alternative for DPI as they would need to maintain objects that would have already been created/updated by the Federal agency.
